

The Controlled Environment Specialists

Meltaway Ceiling Containment System

Save money and time with the Aisle containment Ceiling System. Our simple design and quality materials are the ideal solution for maximizing efficiency and controlling temperatures in both hot aisle and cold aisle containment applications.

This ceiling system also comes with melt-away ceiling tiles allowing you to meet the requirements of your local fire marshal.

Features:

- This cleanroom-grade, fully gasketed 2-inch T-bar grid uses standard 2' by 4' ceiling panels, and is designed for maximum strength.
- Grid comes pre-assembled for quick installation, or order as an easy-to-assemble kit.
- Support lights, tiles, fan units and ductwork for hot-aisle containment, or use with cold aisle containment applications.
- Available with new U.L.- approved, FM-approved, melt-away ceiling tiles that accommodate your overhead sprinkler system. Choose from clear or eggshell white. Panels drop into place and trim easily for smaller openings.
